FOREWORD

The Department of Water Resources, as Watermaster for the West Coast Basin, submits this annual report as a comprehensive review of water supply conditions in the Basin during the 1973-74 water year. The report was prepared for the Los Angeles County Superior Court and for the parties to the West Coast Basin Judgment, whose provisions authorize its publication.

The West Coast Basin is administered by the Department as a Watermaster Service Area in accordance with Part 4, Division 2, of the California Water Code. The Basin has been operating for several years under a well-defined management plan that limits and monitors ground water extractions.

This report contains information on ground water extractions, use of imported water, recharge operations, the administration of the exchange Water Pool, and a financial report on Watermaster Service during the 1973-74 water year.

I. THE WEST COAST BASIN

The West Coast Basin is a relatively small ground water basin underlying the southwestern part of the Los Angeles Coastal Plain. It is bounded on the south and west by the Pacific Ocean, on the north by the Ballona Escarpment, and on the east by the Newport-Inglewood Uplift. The Basin's 160 square miles includes 19 incorporated cities. A substantial portion of the water needed by these communities can be pumped directly from the ground water in storage beneath them.

Some 21 years ago, when an incursion of sea water caused by declining water levels threatened the quality of the ground water supply, timely legal action was begun to halt the overdraft and prevent serious damage to the Basin. Today ground water use in the Basin is monitored by a court-appointed Watermaster whose primary job is to control ground water use and report all significant water-related events in the Basin to the Superior Court in Los Angeles County and parties to the West Coast Basin Judgment. The Basin has been operated under the management of a Watermaster for 13 years.

History of Water Resources Development

The absence of adequate surface water supplies in the West Coast Basin forced the early development of ground water sources. In 1870, the communities of Inglewood and Long Beach had tapped the artesian wells and springs east of the Newport-Inglewood Uplift. When the artesian wells ceased to flow, water users were forced to drill shallow wells. By 1904, about 100 wells were producing 10,000 acre-feet annually. The techniques used to develop ground

water were advanced dramatically in 1909 with the advent of the deep-well turbine pump. Its tremendous adaptability and superior operating characteristics gave countless users access to efficient water wells. Dependable sources of water attracted industry and agriculture and in time the demand for water exceeded the rate at which the Basin was being replenished naturally. The resulting overdraft was clearly shown by falling ground water levels and increasing sea-water intrusion. Water levels throughout the Basin dropped below sea level in the 1920's. Wells along Santa Monica Bay were abandoned by 1920 because the water was too salty to use. By 1932, the entire coastal reach of the Basin had been invaded by sea water.

Ground water deterioration continued until in 1945 the California Water Service Company, the City of Torrance, and the Palos Verdes Water Company filed suit in Superior Court, Los Angeles County. Their objectives: to quiet title to the ground water rights of each pumper and to establish control over ground water extractions from the Basin. Other organizations moved to support the litigations and the West Basin Water Association was formed in 1946. A plan to manage the Basin's water resources was set up to:

- 1) Provide a supplemental supply for major producers
- 2) Limit ground water extractions
- 3) Create an exchange pool to provide pumping rights for users not having access to supplemental water.

The first of these steps was realized in 1947 when the West Basin Municipal Water District (WBMWD) was formed to distribute water from the Colorado River. WBMWD was annexed to The Metropolitan Water District of Southern California (MWD) in 1948, and Colorado River water began flowing into the West Coast Basin.

The second and third steps began when the Court held its preliminary hearings in 1946 to define the ground water problem and outline areas in which more information was needed. The Court then asked the California Division of Water Resources, now the Department of Water Resources (DWR), to define the boundaries and determine the geohydrologic characteristics of the West Coast Basin. Division personnel spent six years analyzing the physical properties of the Basin. The major water producers also retained an "Engineering Advisory Committee" to aid the investigation.

As more information became available, the full magnitude of the problem became evident. In 1949, an amended complaint added 340 parties to the suit. A "Report of Referee" was filed with the Court on September 15, 1952.

Several years passed before water users became sufficiently alarmed by ground water conditions to draft an Interim Agreement that reduced ground water extractions until a final Judgment was approved. The Court approved the Agreement and appointed the Division of Water Resources as Watermaster to administer it.

A "Final Report of Referee" filed on June 8, 1961, included data on ground water conditions between 1950 and 1956. The Report provided the information needed to draft the final Judgment. On August 18, 1961, after 16 years of litigation, the Court rescinded the Interim Agreement and signed the West Coast Basin Judgment. The new Judgment retained DWR as Watermaster.

A second suit, often called the American Plant Growers Case, was filed on October 31,

1956. As a result, 76 additional parties were placed under the jurisdiction of the Court on March 24, 1966. Appendix A lists all parties originally under jurisdiction of the Court and all successors in interest.

Watermaster Service

DWR forms Watermaster Service Areas at the request of water users or by order of the Superior Court. Cost of the service is shared equally by the State and the participating users.

Once a month, every ground water pumper reports his extractions to the Watermaster and each water right account is revised by computation of the amount pumped during the previous month, the total amount pumped thus far during the current water year, and the amount that can legally be pumped during the remainder of the water year. Each pumper receives an updated copy of his account every month.

Accurate measurement of ground water extractions is absolutely necessary to the success of the Basin's management plan. Therefore, the field staff calibrates the water meter on every active water well at least once every two years. Every available means, including system efficiency tests, are used to confirm water meter test results. Inaccurate meters must be repaired in 30 days. Follow-up tests on repaired meters and initial tests on new wells are scheduled whenever necessary.

Once each fall and once each spring of each water year the depth to the static ground water level is measured in about 350 water wells in the Basin. The measurements are used to prepare "fall" and "spring" contour maps of ground water surface and "fall-to-fall" maps of areas of equal elevation change over a one-year period.

Summary of Operating Conditions

Since 1966-67, the water supply and water use conditions have continued to remain stable. In 1973-74, total water use decreased by one percent as compared to the prior year. Ground water extractions have also remained stable over a longer period averaging about 62,000 acre-feet annually since 1958-59. Growth in water requirements has been met by new supplemental sources and the trend is for continued increase in imported water use.

Rainfall was 92 percent of normal and was 28 percent less than the prior year. This was not reflected in an increase in total water use.

Exchange Pool Water requests totaling 486 acre-feet were 52 acre-feet greater than the prior year and sold at \$27.73/acre-foot. Water right leases

during the same period totaled 29 and amounted to 12,645.00 acre-feet. There were four sales of water rights amounting to 194.40 acre-feet.

In the 1973-74 water year, 12 parties overextracted a total of 147.59 acre-feet. Of these, seven parties overextracted by less than the 10 percent or 2 acre-feet limitation set by the Judgment. The five parties in violation of the Judgment leased or purchased sufficient water to offset their overextractions and meet their 1974-75 water needs. As a result, the Watermaster recommends that no action be brought before the Court against the five parties.

The summary below compares statistics for the last two water years and confirms that operating conditions are virtually unchanged from the prior water year.

Item	Water Year	
	1972-73	1973-74
Parties	77	76
Active pumpers	43	42
Active nonparties	5	4
Adjudicated Right, in acre-feet	64,468.25	64,468.25
Watermaster expenses, total	\$ 44,946.74	45,405.71
Watermaster expenses per acre-foot pumped	\$.74	.82
Rainfall, in inches	16.29	11.77
Injection at barrier project, in acre-feet	36,616.00	35,370.00
Extractions, in acre-feet	60,477.84	54,966.10
Imports, in acre-feet	247,999.00	251,931.00
Exports, in acre-feet	- 11,323.00	- 12,055.90
TOTAL WATER USE, in acre-feet	297,153.84	294,841.20

II. WATER SUPPLY

Water from several sources serves Southern California -- Colorado and Owens Rivers water, Northern California water via the State Water Project, mountain runoff, and ground water.

Precipitation

Typically sparse rainfall has little influence on the ground water supply of the West Coast Basin. Impermeable material lying between the surface and the producing aquifers prevents almost all rainfall from reaching zones from which it could be pumped to the surface. Longtime average precipitation is 12.73 inches per year. Average for the 1973-74 water year was 92% of that amount. Locations of precipitation stations used to measure rainfall in the Basin are shown in Figure 2.

Ground Water Recharge

Natural replenishment of the Basin's ground water supply is limited to underflow from the Central Basin, which bounds the West Coast Basin on the east.

TABLE I. SPREADING OPERATIONS ^{a/}

Water source	Quantity (in acre-feet)	
	1972-73	1973-74
Local runoff	44,835 ^{b/}	79,726 ^{b/}
Unpolluted water		
Whittier Narrows	13,600	13,438

With Federal Fund	71,967	59,000
By CM&SD	20,000	20,620
Makeup water from Upper San Gabriel Basin	0	0
TOTAL	158,731	130,811

^{a/} Information provided by SACPD as to amount actually spread in Mendocino Purvey Area.
^{b/} Includes rising water.
^{c/} Amount purchased is slightly higher due to percolation losses, evaporation, etc.
^{d/} With funds from Long Beach action.

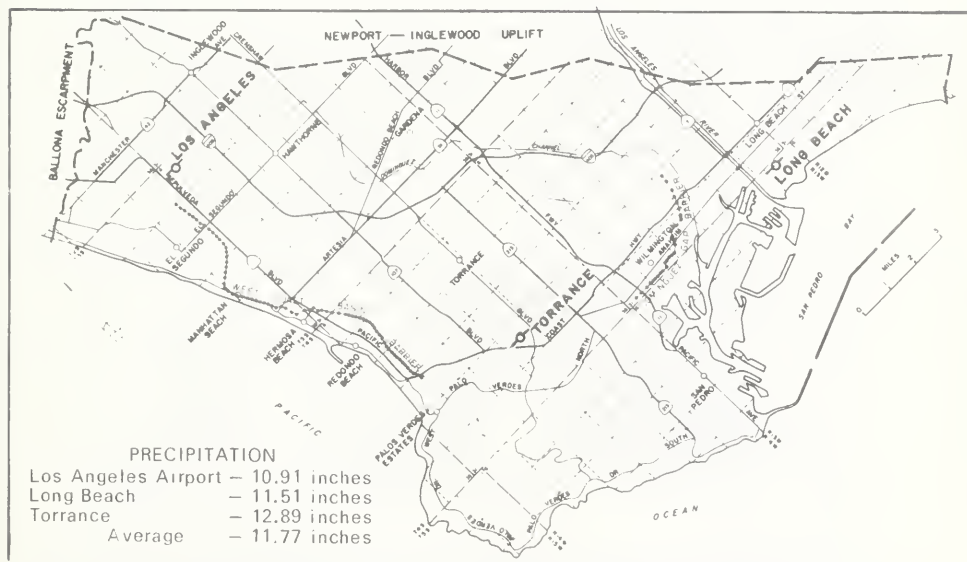

Figure 2. PRECIPITATION STATIONS AND BARRIER PROJECTS

Water spread in the Central Basin percolates into aquifers there and eventually some crosses the Newport-Inglewood Uplift to supplement the ground water supply in the West Coast Basin. Although the water is not directly applied to the West Coast Basin, this process returns large quantities of water to the ground and substantially increases natural subsurface flow from the Central to the West Coast Basin. Effectiveness of the process is limited to the space available in one basin for spreading facilities and the other basin's capability to accept the water. The entire spreading operation is summarized in Table 1. MWD water is no longer purchased with Los Angeles County Flood Control District (LACFCD) Zone 1 funds

because assessments for the fund were terminated on June 30, 1972.

Water Wells

In the 1973-74 water year the West Coast Basin contained 816 wells: 108 active and 126 inactive; 121 injection and 461 observation. Plate 1 shows the location and status of wells as of the end of the water year. No well was drilled and 4 were destroyed. Appendix C lists those destroyed wells.

A numbering system designated as a State Well Number is assigned to all water wells for identification in the Basin (Figure 3).

State well numbers that identify each water well in the West Coast Basin are derived from a system based on the U. S. Public Land Survey. Each number consists of township and range designation, a section number, a letter representing the 40-acre tract in which the well is situated, a sequence number indicating the chronological order in which the well number was assigned, and a letter repre-

sending the base and meridian. The last letter is frequently omitted from well numbers in a single area because all wells there share a single base and meridian. Well numbers are assigned by the Watermaster.

The components of well No. 4S/14W-13D06S, for example, are identified in the following breakdown:

Township	Range	Section	Tract	Sequence number	Base and meridian
<u>4S</u>	<u>14W</u>	<u>13</u>	<u>D</u>	<u>06</u>	<u>S</u>

The derivation of the components is illustrated below.

Figure 3. SYSTEM FOR WATER WELL IDENTIFICATION

Sea-water Intrusion Barrier Projects

Sea-water intrusion in the West Coast Basin along Santa Monica Bay has been effectively halted by a barrier project consisting of a line of 92 injection wells that parallel the coast between the Los Angeles International Airport and the Palos Verdes Hills. LACFCD, which operates the project, injects filtered Colorado River water into the barrier to create a pressure ridge that impedes the inland movement of a salt-water front and maintains protective ground water elevations in the Silverado and "200-foot sand" aquifers. Water for the barrier is purchased by the Central and West Basin Water Replenishment District (CWBWRD) and delivered by MWD. Scope of the project is shown in Figure 4, which illustrates the extent to which sea water has intruded into the merged phases of the Silverado aquifer. In January 1973, Northern California water was injected for seven days and resumed in September 1974.

A second barrier to sea-water intrusion was built by LACFCD along San Pedro Bay. This project, called the Dominguez Gap barrier project, started operations during February 1971 and operates in a manner similar to the West Coast Basin barrier project. The project has 29 injection wells located as shown in Figure 2. Table 2 gives additional data on the barrier projects. In January 1973, Northern California water was injected for seven days and resumed in September 1974.

TABLE 2. BARRIER OPERATIONS ^{a/}

Operation	West Coast Basin	Dominguez Gap
Quantity injected, in acre-feet	27,541	7,829
Average injection rate, cubic feet per second	38.04	11.51
Number of injection wells	92	29
Number of observation wells	264	197
Number of injection wells to be added during 1974-75 water year	11	0
Number of observation wells to be added during 1974-75	3	19

Ground Water Levels

The volume of ground water stored in the West Coast Basin is constantly changed by variations in subsurface inflow and outflow, artificial recharge, extractions, and in precipitation, to a lesser degree. The Silverado aquifer, underlying most of the West Coast Basin, is the most productive aquifer in the Basin. Ranging from 100 to 500 feet in thickness, it yields from 80 to 90 percent of the ground water extracted annually.

Measurements of ground water surface elevations (Plates 2 and 3) and the summarization of changes in water level elevations (Plate 4) demonstrate an increase in storage along the northern part of the Basin, where extractions have been reduced, and a decrease in storage in the southeastern area, where extractions have increased. The hydrographs of selected wells representative of the various aquifers underlying the Basin show that the water surface has stabilized (Figures 5, 6, 7). In some cases, it has risen slightly, due to recharge operations and changing extraction patterns.

In Lieu Replenishment

During the 1965-66 water year, CWBWRD, began a program of in lieu replenishment. By contract with it, any producer with access to supplemental water may use it instead of water pumped from the ground. The program may be used to:

- 1) Alter pumping patterns within a ground water basin;
- 2) Replenish areas of low transmissibility where conventional recharge techniques are ineffective;
- 3) Heighten the effect of injecting water to form a sea-water barrier by reducing nearby extractions;
- 4) Reduce the amount of replenishment water purchased by CWBWRD;
- 5) Reduce the annual ground water extraction from the West Coast Basin.

When CWBWRD first announced its intention to begin in lieu replenishment, several West Coast Basin producers expressed an interest. However, the only producer to participate so far has been the California Water Service Company. The in lieu replenishment program is an effective basin management tool which, if expanded, could obtain significant beneficial results. CWBWRB, 7439 East Florence Avenue, Downey, California, 90240, is a source of additional information.

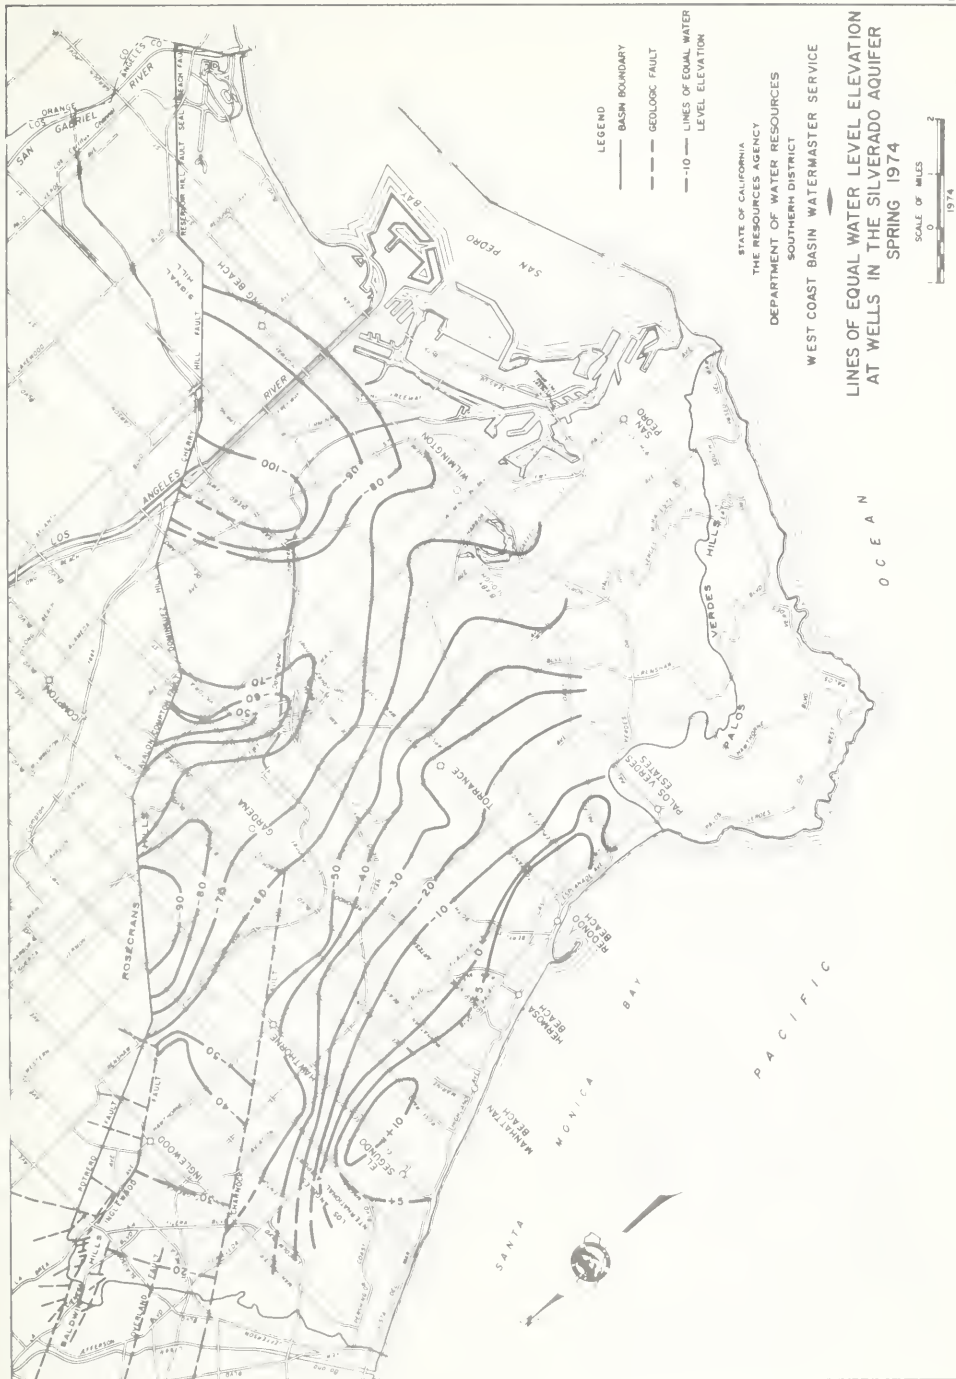

TABLE 3 IN LIEU REPLENISHMENT PROGRAM ^{a/}

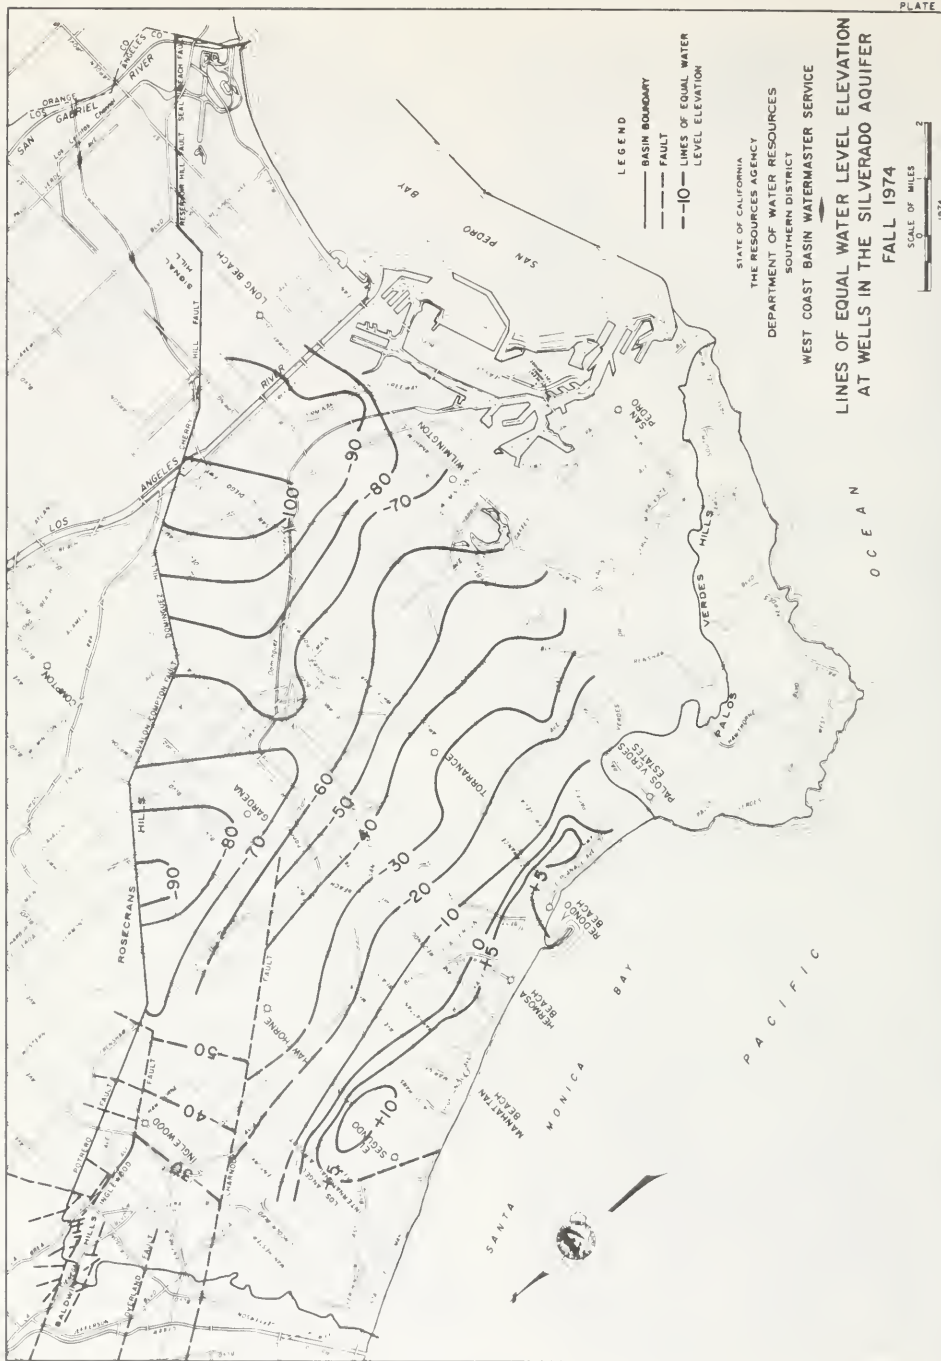

Water year	Amount contracted (in acre-feet)	Contract price (dollars per acre-foot)	Total Payment
1965-66	744.59	\$ 12.33	\$ 9,186.79
1966-67	850.57	14.14	12,027.04

a/ Information provided by CWBWRD.

Water Quality

Providing good quality ground water for the West Coast Basin depends on a great extent on the use of correct water-well construction methods. Some aquifers in the Basin are hydraulically connected to the ocean and occasionally sea water moves from them into adjacent freshwater aquifers. If a well being drilled without proper casing techniques passes through both saline and freshwater aquifers, the sea water can move from the polluted aquifer to the unpolluted one.

To prevent such occurrences, DWR conducted an intensive investigation that resulted in recommended standards for water-well construction and destruction.^{1/} Adoption hearings on these standards were held in 1969 by the California Regional Water Quality Control Board, Los Angeles Region, (CRWQCBLA) and all local agencies and municipalities in the West Coast Basin have adopted them.

Solid waste is another factor that can affect ground water quality in the Basin. A shortage of disposal sites for this material has become increasingly critical. Abandoned gravel pits are particularly sought after. One of these is the Chandler Pits, just south of the Pacific Coast Highway. Several applications for permission to use this site have been refused because of the potential degradation of ground water.

CWBWRD, the West Basin Water Association, and others have vigorously opposed these applications. One applicant had asked to deposit decomposable solid waste in the pits.

In December 1968, CRWQCBLA reaffirmed its restriction of deposition of inert material. The matter was appealed, but during the 1970-71 water year the appeal was dropped. During the ensuing water years, no additional requests to use the pits for solid waste disposal were received.

^{1/} DWR Bulletin No. 74 "Water Well Standards; State of California", February 1968; and DWR Bulletin No. 107, "Recommended Well Construction and Sealing Standards for Protection of Ground Water Quality in West Coast Basin Los Angeles County", August 1962.

Basinwide Water Quality Monitoring

In compliance with the Beilenson Health Act, the West Basin Water Association has initiated a basinwide plan to monitor the quality of water being pumped for domestic use.

Title 17 of the California Administrative Code, more particularly Part 1, Chapter 5, Subchapter 1, defines the limits of the trace elements and pollutants acceptable for water for domestic use. Sixteen wells were selected for monitoring: two each belonging to the City of Los Angeles and the California Water Service Company; 12 under a cooperative plan sponsored by the cities of Manhattan Beach, El Segundo, Hawthorne, Inglewood, Torrance, the Southern California Water Company and Dominguez Water Corporation, and the Los Angeles County Water Works District No. 22. Laboratory work is performed by the Clinical Laboratories of San Bernardino.

Construction Projects Affecting Water Supply

Three major projects have significantly affected the water supply of the West Coast Basin: The State Water Project, MWD's distribution system, and the second barrel of the Owens River-Mono Basin Aqueduct of the City of Los Angeles.

They have been completed and are providing service to the Basin. MWD's Sepulveda Feeder began deliveries on December 1, 1972, and is the main source of northern California water for the Basin. State Water Project water formed approximately 20 percent of the total water imported during 1973-74.

III. WATER USE

In the 1973-74 water year, the West Coast Basin provided approximately 295,000 acre-feet, 1,000 acre-feet less than in the previous year. Ground water extractions were approximately 5,500 acre-feet less and imported water was 4,000 acre-feet greater than the previous year's.

Population increase in the West Coast Basin has caused water demand to increase substantially since 1943. Prior to 1955, ground water met most of the demand. However, when the Judgment reduced extractions to about 60,000 acre-feet annually, imported water became the largest component of the Basin's water supply.

Figure 8 depicts the monthly relationship between rainfall, ground water extractions, and imported supplies. Figure 9 illustrates annual ground water extractions and total water use from 1933 to the present. Much of the increase since the 1963-64 water year may be attributed to the West Coast Basin barrier project. Water demand for that purpose has leveled off since completion of the project in 1968.

^a See Table 1 for explanation of words in our head water right entitlements.

^b Formerly Columbia Broadcasting System, Inc.; name change only.

^c Lease provision or transfers narrower flexibility right.

^d Entire amount is exchange pool water right.

^e Includes extractions by Inglewood Golf Course.

^f Extractions by Los Angeles County: Alondra Park, Westwood Golf Club, No. 1 and No. 2, and Western Avenue 2 Golf Course have an interagency water right exchange whereby all water right balances are combined and divided between agencies in proportion to their needs or water right.

^g Party under the former Torrance San and Sewer District on wells for development of area. See footnote e.

Ground Water Extractions

The West Coast Basin Judgment limits the amount of ground water that each party can extract annually from the basin or release to the Exchange Pool for pumping by other parties. Table 4 summarizes each party's water account. The metered ground water production

from each active well in the Basin is listed by party in Appendix B, which shows the total ground water production reported by each party. Gross water supply of all parties, which appears in Table 5, includes all sources of water necessary to provide each party's total water requirement for its service area. The service areas are shown on Plates 5 and 6 (Pages 30-33).

- a/ Imports from Metropolitan Water District or member agency unless otherwise noted.
b/ Purchased from municipal, mutual, or public utility water agency.
c/ Domestic use with consumption less than one acre-foot purchased from public utility.
d/ Information not available.
e/ Includes 2,810 acre-feet of Central Basin ground water.
f/ Of this amount 26.7% is exported to Central Basin.
g/ Includes Central Basin ground water.
h/ Imported from Owens River-Mono Basin.
j/ Includes 1,535 acre-feet of Central Basin ground water.

Extractions by Nonparties and Parties with No Adjudicated Rights

Several nonparties and parties with zero Adjudicated Rights pump water from the West Coast Basin. Parties with zero water rights have abided by the Judgment by offsetting their pumping with Exchange Pool purchases. Their extractions are reported to CWBWRD (Table 6).

TABLE 6. EXTRACTIONS BY NONPARTIES AND PARTIES WITH ZERO ADJUDICATED RIGHTS

* Parties to the Judgment, shown in Table 4.

** See Footnote G on Table 4.

Imported Supplies

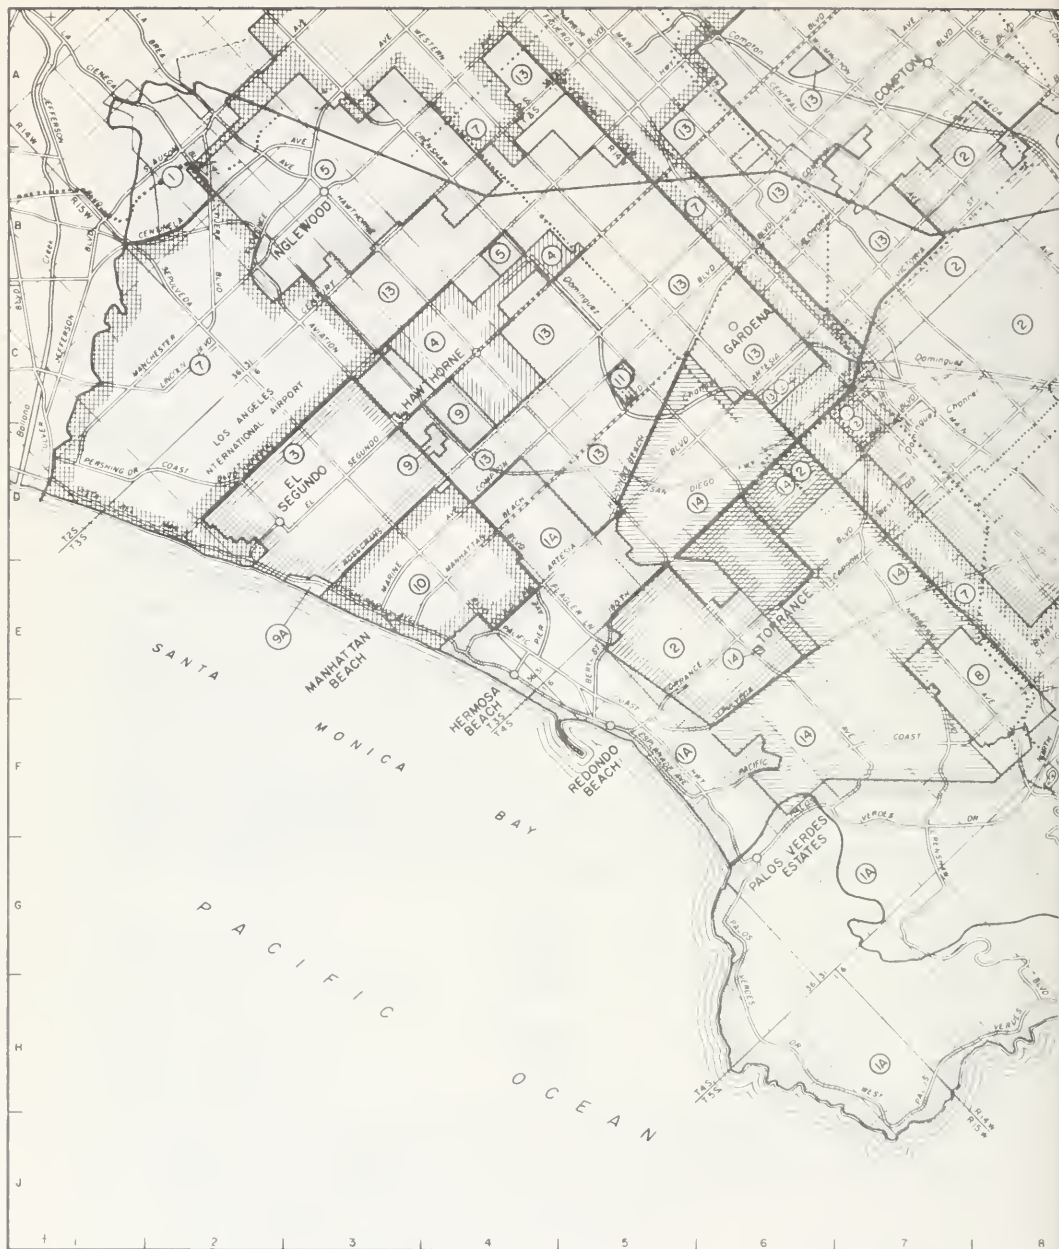

Large quantities of water are imported to the West Coast Basin from other sources. Water from the Colorado River

and State Water Project arrives through facilities of MWD for distribution by WBMWD and the cities of Long Beach, Los Angeles, and Torrance. Los Angeles also imports water from the Owens River-Mono Basin in eastern central California. The Dominguez Water Corporation, Long Beach, and the Southern California Water Company import ground water from the Central Basin to supplement other supplies.

All imports to the West Coast Basin, with the exception of imports by two nonparties, are listed in Table 7. The California-American Water Company imported 2,684 acre-feet and the City of Signal Hill imported 828 acre-feet. Both are nonparties.

Exported Supplies

Exports from the West Coast Basin are small. The City of Inglewood exported 3,076 acre-feet of ground water, Colorado River and State Water Project water to the Central Basin. The City of Los Angeles exported 1,357 acre-feet and the California Water Service Company exported 7,624 acre-feet of ground water, Colorado River, and State Water Project water to portions of their service areas lying west of the Palos Verdes Hills.

IV. ADMINISTRATION OF THE JUDGMENT

The West Coast Basin Judgment was a logical step toward preserving the usefulness of a valuable resource. It provides a flexible tool to limit extractions and still allow a beneficial use of the ground water supply. However, the restrictions on extractions imposed by the Judgment force the parties to look for other supplies. Fortunately, these are available. If they were not, the rapidly increasing demand for water might literally bankrupt the Basin before other management techniques could be developed.

Exchange Pool

The Court and parties foresaw that adjudicating water rights and limiting total extractions within the Basin would not be satisfactory to all parties. As a consequence, Paragraph VII of the Judgment authorized a water Exchange Pool to provide additional water rights to members without supplementary water. Membership in the Exchange Pool is voluntary, and any party can join by filing an "Intention to be Bound by Paragraph VII of the Judgment"

TABLE 8. EXCHANGE POOL OFFERS

with the Watermaster and the Court. Recipients of exchange water may pump the amounts released to them in addition to their Adjudicated Right. Releases are limited by the Judgment. Tables 8 and 9 summarize 1973-74 Exchange Pool transactions.

Once each July the Watermaster opens the Exchange Pool to permit the inter-member exchange of water rights. The Pool is in operation when the Watermaster asks each member to estimate his water requirement and supply for the next water year. If a member has supplemental water in addition to his Adjudicated Right and if his total supply exceeds his estimated requirement, he must make a Mandatory Offer to lease a portion of his pumping right equal to the difference between his Adjudicated Right and half his estimated requirement. Under no circumstance, however, can the Mandatory Offer and the estimated requirement together exceed the total supply. This limits the Mandatory Offer to an amount which can be replaced with supplemental water.

Another type of offer is called the Voluntary Offer. Any member may volun-

a/ Cost at \$27.7304 per acre-foot.

tarily offer pumping rights to the Exchange Pool if his water supply exceeds his estimated requirement and he has no supplemental supply. However, the Watermaster must allocate all Mandatory Offers before using the Voluntary Offers. Voluntary Offers have not been used for several years.

The charge for a Mandatory Offer cannot exceed the cost per acre-foot of replacement water; the charge for a Voluntary Offer cannot exceed the price per acre-foot charged by the West Basin Municipal Water District for imported water. The Watermaster determines the amount of water needed and computes the average price to be paid.

If a member's estimated water requirement exceeds his total water right, including leases, and he has no supplemental supply, the difference may be requested from the Exchange Pool. The cost per acre-foot is the weighted average price per acre-foot of all offers required to meet requests.

Transfers of Adjudicated Rights

The West Coast Basin Exchange Pool is not the only method of obtaining additional pumping rights. Each year there are several lease and sale transactions between parties. Table 10 lists all leases, sales, parties, and amounts involved. Appendix A contains a copy of the document substantiating each transfer.

Appendix A also contains samples of recommended lease and sale agreements. Some documents received by the Watermaster are unnecessarily complex. The Watermaster recommends that documents be prepared on 8-1/2 x 11-inch paper. Any necessary additions to the recommended agreement may be attached to another page. You need not use these sample documents, but they are sufficient for most purposes.

In leasing, buying, or selling water rights, parties should be specific as to the type being exchanged, i.e., Adjudicated Right. All leases should be entered into on the basis of Adjudicated Right and should specify both amount of Adjudicated Right, to the nearest whole acre-foot, and period of lease. All water right leases should be made on a water year basis, i.e., October 1 through September 30 of the following year, never on a fiscal year basis.

The "General Information, Policies and Procedures" of the Watermaster Service in the West Coast Basin contains the following requirement:

"In order that a water right lease be in force (applicable) during a particular water year, it must have been executed by the parties involved before or prior to September 1 of the water year in question. In addition the executed water right lease document must be filed with the Watermaster no later than August 31 or postmarked August 31 of the year in question. Any otherwise valid agreement not filed with the Watermaster prior to September 1 of the water year in question will be void and of no force or effect for the transfer of water rights."

Overextractions

Each year some parties extract more ground water from the West Coast Basin than they are entitled to. The overextractions are usually small, occurring within the tolerance set by the Judgment. The Judgment allows each party to overextract by 2 acre-feet, or by 10 percent of its Adjudicated Right, whichever is larger, on the premise that the overextraction will be eliminated during the following year.

Most overextractions are the result of an unexpected increase in water

* Lease includes carryover flexibility right.

demand. Therefore, allowing some deviations from the limits and guidelines of the Judgment is considered a reasonable solution.

Table 11 summarizes all overextractions. Of the twelve parties listed, five exceeded the limit imposed by the Judgment. All five parties have purchased exchange pool water to meet their 1974-75 water needs.

The Watermaster recommends that no court action be taken at this time against the parties exceeding the limit.

Carryover of Adjudicated Right

The provision in the Judgment (Paragraph VI) relative to allowable carryover of unused water right states in part: "...each of the parties... who ... does not extract ... all of such party's Adjudicated Right ... is permitted to carry over from such

water year the right to extract...in the next succeeding water year an amount of water equivalent to the excess of Adjudicated Right over his extraction during said water year not to exceed, however, 10% of such party's Adjudicated Right or two acre-feet, whichever is the larger." (Emphasis added.)

The Watermaster, in reviewing water right lease documents, assumes that when not specifically conveyed to the lessee by the lease document, the amount leased is not deducted from the lessor's Adjudicated Right in computing the permissible allowable carryover or overextraction.

All lease documents should contain a statement as to which party is entitled to the benefit of the amount leased in computing carryover or overextractions. Item (5) in the suggested Water Right License and Agreement shown on page 62, is sufficient for this requirement.

V. ADMINISTRATIVE COSTS

Expenses incurred in administering Watermaster Service Areas are payable one-half by the State and one-half by the parties. To obtain the funds required, the Watermaster prepares a tentative budget each year, stating the anticipated expense for administering the provisions of the Judgment. A copy is mailed to each of the parties at least 60 days before the beginning of each water year. If no objections are received within 15 days, it then becomes final.

The 1973-74 tentative budget, mailed on July 31, 1973, received no objections and became the final budget on August 15, 1973. The final approved budget is presented in Table 12. The

administrative cost chargeable to each party is in proportion to its "Adjudicated Right" and is payable on, or prior to, the first day of the water year. A 5 percent penalty is added if charges become delinquent. A total of \$21.11 was collected in penalties for delayed payments. Apportionment of the parties' share of the budget for the 1973-74 water year is set forth in Table 13.

Income and expenditures for Watermaster Service during the 1973-74 water year are shown in Table 14. Any credit or debit balance is carried forward into the succeeding water year. The parties' share of the 1973-74 carryover amounts to \$6,324.04

ALIGNMENT OF LEASE AND TRANSFER OF WATER RIGHTS

Industrial Chemicals Division, Allied Chemical Corporation, hereinafter referred to as "Allied" hereby issues and transmits to Atlantic Richfield Company, hereinafter referred to as "Atlantic Richfield" or "Hessco" the following, in the period beginning January 1, 1974 and ending September 30, 1974, hereinafter referred to as "said period" water rights consisting of the right to pump one hundred (100) acre feet (AF) of water out and discharge (or pump out and discharge) from the following:

Being a ground water basin within the central and West Rio Water Picking down District, in the State of California.

This license shall be subject to the following conditions:

- 1 Atlantic Richfield shall pay to Allco, by check a rental of twenty-one
2 and no/100 Dollars (\$29.00) per acre-foot for the water rights leased and
3 transferred.
- 4 Total consideration therefore, computed on the basis of said Rental of Two Hundred
5 and fifty five (255) acre feet is Seven thousand and three hundred ninety five
6 dollars (\$7,395.00) which shall be paid to Allco in nine (9) equal months
7 (Installments of Eight hundred twenty-nine and 67/100 Dollars (\$829.67) beginning
8 on the fifteenth day of February, 1970, and continuing on the fifteenth day of each
9 month thereafter for a period of nine (9) months.
- 10 Atlantic Richfield will keep and maintain accurate records of the ground
11 water extractions made hereunder and shall report the same to the Central
12 and West Basin Water Replenishment District, to the foregoing named water
13 purveyor, the Department of Water Resources, or the State of California
14 to all other agencies to whom such reports must be made, and to Allco.

[illegible]

Said license is granted subject to the following conditions:

- (1) Licensee shall acquire said right and attach the same on behalf of the person or persons entitled to the period above specified and at the same time shall cause all necessary work to be done to the exercise hereon of said right and shall hold the same in fee simple, subject to the right of the licensee to terminate the same at any time.
- (2) Licensee shall cause the necessary work in the pumping of said ground water to be installed on West Los Angeles Water Corporation District.
- (3) Licensee shall notify the District and the Watermaster that said pumping was done pursuant to this license and provide the Watermaster with a copy of this document.
- (4) Licensee shall not in carrying out water production for the period of the agreement that said pumping was done pursuant to this license.
- (5) Licensee shall reimburse Dominguez Water Corporation for any and all valorem taxes which may be levied on the value of water rights licensed hereunder, but which are not subject to the same, have both been and excepting from same license.
- (6) This license shall at all time be subject to such changes or modifications by the Public Utilities Commission of the State of California as said Commission may from time to time direct in the exercise of its jurisdiction.
- (7) This license shall not become effective until the authorization of the Public Utilities Commission of the State of California has been first obtained.
- (8) The valuable consideration for this license may be subject to accretion.
- Dominguez Water Corporation warrants that it has more than 1,500 acre feet of adjudicated right and that it has not pumped and will not pump or permit or license any other person to pump any part of the said 1,500 acre feet licensed to it by this license for the period of the term of this license for 30, 1974.

DOMINGUEZ WATER CORPORATION

ATLANTIC RICHFIELD COMPANY

By C. B. Burns
Title President

By Atkins
Title: Vice President

By Arthur C. Bates
Treasurer Secretary

By John E. [unclear]
Title all [unclear]

United Artists will prepare, file and send a copy to Allied of all contracts, documents and papers in connection with the present and Allied's water rights hereby listed, without cost to Allied.

4. All other: All field shall pay to the District any and all ground water (production) assessments levied by the District on the production of ground water extracted by licensee on Allid's said two hundred and fifty-five (255) acre feet of water in the West Basin.

Atlantis Richfield shall notify the District and the Watermaster that such ground water extraction was made pursuant to the provisions of this license

Allied has been adjudicated to own at least two hundred and thirty five (235) acre feet of water in the case entitled California Water Servicing Company, et al vs. City of Longton, et al Los Angeles Superior Court Case No. 506,808. However, Allied expressly makes no warranty that it is the owner of how the right to lease the water rights purported to be leased hereunder.

the event, however that it is deemed at any time during the term hereof that Allied does not own the rights leased hereunder or any part thereof, Allied shall return to Atlantic Richfield any consideration paid to Allied, computed on the above price per acre, even if any water rights held by Atlantic Richfield is unable to exercise because of Allied's lack of ownership in said water rights. Allied does not warrant that there is sufficient water in said West Basin as to enable Atlantic Richfield to extract the rights leased to it hereunder, but in the event that Atlantic Richfield is prevented from exercising all or any portion of the rights leased hereunder due to exhaustion of said basin or intervention or prohibition by any legally constituted government authority, any consideration paid by Atlantic Richfield to Allied shall be

returned to Atlantic Richfield upon the same basis as that stated above.

It is further agreed that Atlantic Richfield shall not pump water from said West Basin during the term of this license in a quantity which would include any portion of the two hundred and fifty five (255) acre feet leased hereunder.

Atlantic Richfield shall pay all power costs and other production costs in connection with the production of the water referred to herein.

Either party to this lease shall desire to serve a notice on the other, such notice shall be deemed to have been made if those sent to the address set forth below:

J. S. HANWY, MANAGER
ALLIED CHEMICAL CORPORATION
2501 So. Sepulveda Blvd.
Beverly Hills, California 90245

and all notices sent to Atlantic Richfield are mailed to:

ATLANTIC RICHFIELD COMPANY
1901 E. Sepulveda Blvd.
Carson, California 90745
Attn: B. E. Varon

Delivery will be deemed to have been made when deposited in the United States mail, postage prepaid. Either party may, by notice in writing to the other, change such address for notices to it. In witness whereof the parties hereto execute this agreement on the date first above written.

NO.

WATER USE LICENSE

The City of Inglewood, a municipal corporation, hereinafter referred to as "INGLEWOOD", hereby grants to Atlantic Richfield Company, hereinafter referred to as "ATLANTIC", a license to extract 1,000 acre-feet of INGLEWOOD'S Restricted Pumping allocated to INGLEWOOD under the terms of the Decree in the action: California Water Service Company, et al. vs. Compton, No. 504806, during the period commencing October 1, 1973, and continuing to and including September 30, 1974.

(1) Licensee shall exercise said right and extract the same on behalf of INGLEWOOD during the period above specified and put the same to beneficial use and licensee shall not by the exercise hereunder of said right acquire any right to prevent water independent of the rights of licensor.

(2) ATLANTIC will pay to the Central and West Basin Water Replenishment District any pumping assessments levied by the District during the 1973-74 water year on the quantity of water extracted by ATLANTIC from the West Basin under said license.

(3) ATLANTIC will keep and maintain records of agreed production under this agreement and will report same to the Watermaster and to INGLEWOOD upon completion of ATLANTIC'S pumping.

INGLEWOOD warrants that it has 1,000 acre-feet of Restricted Pumping and that it has not pumped and will not pump or permit or license any other person to pump any part of said 1,000 acre-feet during the period of October 1, 1973 through September 30, 1974.

AGREEMENT

THIS AGREEMENT made and entered into this 10th day of January, 1974, by and between the CITY OF INGLEWOOD, a municipal corporation, hereinafter referred to as "INGLEWOOD" and ATLANTIC RICHFIELD COMPANY, hereinafter referred to as "ATLANTIC":

RECITALS

WHEREAS, both INGLEWOOD and ATLANTIC are producing from the West Basin; and

WHEREAS, INGLEWOOD has an allowed pumping allocation of 4402.09 acre-feet of water per annum in said Basin; and

WHEREAS, ATLANTIC desires to make temporary use of a portion of INGLEWOOD'S allowed pumping allocation for one water year only;

NOW, THEREFORE, THE PARTIES HERETO AGREE AS FOLLOWS:

1. INGLEWOOD has granted to ATLANTIC by a separate document a license to produce a portion of INGLEWOOD'S West Basin allowed pumping allocation in the quantity of 1,000 acre-feet for the water year which commences October 1, 1973, and which water year ends on September 30, 1974.

2. ATLANTIC agrees to pay INGLEWOOD the net sum of \$29,000 in October, 1974.

IN WITNESS WHEREOF, the parties hereto have authorized the due execution hereof by their respective officers on the day and year first above set forth.

WATER RIGHTS LICENSE

64153.6

For a valuable consideration, UNION OIL COMPANY OF CALIFORNIA, a corporation (Union), hereby grants to ATLANTIC RICHFIELD COMPANY, a corporation (Licensee), a license to abstract, during the period beginning October 1, 1973 and ending September 30, 1974, 1,050 acre-feet of the 1,050 acre-feet of Adjudicated Right owned by Union under and pursuant to the provisions of the Judgment dated August 18, 1961, entered in Los Angeles County Superior Court Case No. 586,898, entitled "California Water Service Company, et al, vs. City of Compton, et al".

This license shall be subject to the following conditions:

1. Licensee shall exercise this license and shall abstract the aforesaid 1,050 acre-feet of Adjudicated Right on behalf of Union during the above specified period and shall put the same to beneficial use and Licensee shall not by the exercise hereunder of Union's right acquire any right to abstract water independent of the rights of Union.
2. Licensee shall keep and maintain accurate records of its ground water abstractions made hereunder and shall report the same to the Central and West Basin Water Replenishment District, to the court-appointed Watermaster, being the Department of Water Resources of the State of California, and to Union.
3. Licensee shall notify the District and the Watermaster that such ground water abstraction was made pursuant to the provisions of this license agreement, a copy of which shall be provided to the Watermaster by Union.
4. Licensee shall pay to the District all ground water replenishment assessments levied by the District on the quantity of ground water abstracted by Licensee hereunder.

Union warrants that it owns the aforesaid 1,050 acre-feet of Adjudicated Right and that the same has not been or shall it be abstracted by Union or by any other party under authority granted by Union, during the period beginning October 1, 1973 and ending September 30, 1974.

DATED: November 16, 1973.

SUCCESSION OF CHANDLER'S PALOS VERDES SAND & GRAVEL CO.

FOR VALUE RECEIVED, the said Watermaster has granted to DOMINGUEZ WATER CORPORATION, a corporation organized under the laws of the State of California, all of its right, title and interest in and to the water right described in the Judgment in the Los Angeles Superior Court Case No. 506,806, entitled "California Water Service Company, et al., v. City of Compton, et al.", during the period commencing on the 1st day of January, 1974, and continuing to and including September 30, 1974.

Said license is granted, subject to the following conditions:

(1) Licensee shall exercise said right and extract the same in full, shall exercise said right during the period above specified and put the same to beneficial use and licensee shall not by the exercise hereunder of said right acquire any right to extract water independent of the rights of the licensor.

(2) Licensee shall pay assessments levied on the pumping of said ground waters by the Central and West Basin Water Replenishment District.

(3) Licensee shall notify the District and the Watermaster that said pumping was done pursuant to this license and provide the Watermaster with a copy of this document.

(4) Licensee shall not, in any recording of water produced under the terms of agreement, that said pumping was done pursuant to this license.

DOMINGUEZ WATER CORPORATION, a corporation organized under the laws of the State of California, hereby accepts from LAGERLOF, a corporation organized under the laws of the State of California, all of its right, title and interest in and to the water right described in the Judgment in the Los Angeles Superior Court Case No. 506,806, entitled "California Water Service Company, et al., v. LEASE OF WATER RIGHTS

THIS LEASE is entered into the 22nd day of March, 1974, by and between DOMINGUEZ WATER CORPORATION, a corporation, hereinafter DOMINGUEZ, and STANLEY C. LAGERLOF, an individual, hereinafter LAGERLOF.

For and in consideration of the mutual undertakings and obligations of the parties as hereinafter set forth, and for other valuable consideration, the parties hereto agree as follows:

1. LAGERLOF has acquired the right to produce, extract and withdraw 3.5 acre feet of water per annum from the West Coast Basin, as said basin is described in the Judgment in the Los Angeles Superior Court Case No. 506,806, entitled "California Water Service Company, et al., v. City of Compton, et al."

2. LAGERLOF hereby leases to DOMINGUEZ and DOMINGUEZ hereby accepts from LAGERLOF 3.5 acre feet of said right.

3. The term of this lease shall commence on the date of this lease and continue to and including September 30, 1974.

4. DOMINGUEZ shall pay to LAGERLOF the sum of \$105.00 on or before September 30, 1974.

5. DOMINGUEZ shall pay, before delinquency, all pumping assessments levied by the Central and West Basin Water Replenishment District on LAGERLOF'S said water rights.

FOR VALUE RECEIVED, the said Watermaster has granted to DOMINGUEZ WATER CORPORATION, a corporation organized under the laws of the State of California, all of its right, title and interest in and to the water right described in the Judgment in the Los Angeles Superior Court Case No. 506,806, entitled "California Water Service Company, et al., v. City of Compton, et al.", during the period commencing on the 1st day of January, 1974, and continuing to and including September 30, 1974.

(1) Licensee shall exercise said right and extract the same in full, shall exercise said right during the period above specified and put the same to beneficial use and licensee shall not by the exercise hereunder of said right acquire any right to extract water independent of the rights of the licensor.

(2) Licensee shall pay assessments levied on the pumping of said ground waters by the Central and West Basin Water Replenishment District.

(3) Licensee shall notify the District and the Watermaster that said pumping was done pursuant to this license and provide the Watermaster with a copy of this document.

(4) Licensee shall not, in any recording of water produced under the terms of agreement, that said pumping was done pursuant to this license.

DOMINGUEZ WATER CORPORATION, a corporation organized under the laws of the State of California, hereby accepts from LAGERLOF, a corporation organized under the laws of the State of California, all of its right, title and interest in and to the water right described in the Judgment in the Los Angeles Superior Court Case No. 506,806, entitled "California Water Service Company, et al., v. City of Compton, et al.", during the period commencing on the 1st day of January, 1974, and continuing to and including September 30, 1974.

EXCHANGE OF WATER RIGHTS

The Parties hereto, DOMINGUEZ WATER CORPORATION, a California corporation, hereinafter DOMINGUEZ, and PICO COUNTY WATER DISTRICT, a county water district organized under Division 12 of the Water Code of California, herein-after DISTRICT.

This agreement is based on the following facts:

1. DOMINGUEZ has rights to produce water from the Central Basin of California adjudicated to it under Central and West Basin Water Replenishment District v. Charles E. Adams, et al., No. 786,656, Los Angeles Superior Court, and has the right to extract not less than 200 acre feet from said basin for the balance of the water year 1973-74.

2. DISTRICT has acquired by lease the right to extract not less than 145.50 acre feet of water from the West Coast Basin for the balance of the water year 1973-74.

3. The Parties desire to exchange said rights on the terms and conditions set forth below.

The parties hereto agree as follows:

A. DISTRICT hereby gives and transfers to DOMINGUEZ its right to extract water from the West Coast Basin for the water year 1973-74 to the extent of 145.50 acre feet and no more.

B. DOMINGUEZ hereby gives and transfers to DISTRICT its rights to extract water from the Central Basin for the water year 1973-74 to the extent of 145.50 acre feet and no more.

C. Each party agrees to pay before delinquency all pumping assessments levied by the Central and West Basin Water Replenishment District on the water rights being transferred to each.

D. Each party agrees to pump and extract the full amount of 145.50 acre feet of water from the basin in which the transferred rights exist and put said amount to beneficial use therein prior to the end of the 1973-74 water year.

E. Each party agrees that the 145.50 acre feet extracted by it following the date of this agreement from the basin in which said rights were transferred to it shall be deemed to be pursuant to and in exercise of the rights transferred hereby.

F. Each party agrees that the rights of each of them with respect to allowable overextractions or in the computation of carryover rights shall not be affected by the exchange of water rights provided herein. Their respective rights to allowable overextractions and carryover rights shall be determined and computed as though this exchange had not been made.

NO. 10790
AGREEMENT

between

DEPARTMENT OF WATER AND POWER
OF THE CITY OF LOS ANGELES

and

LOS ANGELES COUNTY
WATERWORKS DISTRICT NO. 13 (LONITA)

6. The Parties desire to exchange said allotments on the terms and conditions set forth below.

A. DISTRICT hereby permits DEPARTMENT to extract water from the West Coast Basin for the water year 1973-74 to the extent of 250 acre-feet and no more.

B. DEPARTMENT hereby permits DISTRICT to extract water from the Central Basin for the water year 1973-74 to the extent of 250 acre-feet and no more.

C. Each Party agrees to pay before delinquency all pumping assessments levied by the Central and West Basin Water Replenishment District on each Party's pumping allotments.

D. Each Party agrees to extract the full amount of 250 acre-feet of water from the basin in which the transferred pumping allotment exists and put said amount to beneficial use therein prior to the end of the 1973-74 water year.

E. Each Party has the right to over-extract or under-extract as much as 25 acre-feet pursuant to the terms of the aforementioned Judgments.

F. Each Party agrees that the 250 acre-feet extracted by it following the date of the Agreement from the basin in which said pumping allotments were transferred to it shall be deemed to be pursuant to an exercise of the allotments transferred hereby.

DATE: SEP 10 1974

-2-

EXCHANGE OF PUMPING ALLOTMENTS

The Parties hereto are THE LOS ANGELES COUNTY WATERWORKS DISTRICT NO. 13 (LONITA), a public corporation, herein referred to as "DISTRICT" and the DEPARTMENT OF WATER AND POWER OF THE CITY OF LOS ANGELES, herein referred to as "DEPARTMENT."

This agreement is based on the following facts:

1. DEPARTMENT has an Allowed Pumping Allocation to produce water from the Central Basin of California adjudicated to it under Central and West Basin Water Replenishment District vs. Charles E. Adams, et al., No. 786,656, Los Angeles County Superior Court, and has the right to extract not less than 250 acre-feet from said basin for the balance of the water year 1973-74.
2. DISTRICT has an adjudicated right to produce water from the West Coast Basin of California adjudicated to it under California Water Service Company, et al. vs. City of Compton, et al. No. 506,806, Los Angeles County Superior Court, and has the right to extract not less than 250 acre-feet of water from said basin for the balance of the water year 1973-74.
3. DISTRICT has limited operational flexibility to extract its Allowed Pumping Allocation in the Central Basin, but has greater operational flexibility to extract water in the West Coast Basin.
4. Conversely, DEPARTMENT has limited operational flexibility to extract its adjudicated right in the West Coast Basin, but has a greater operational flexibility to extract water in the Central Basin.
5. An exchange of pumping allotments would increase the operational flexibility of both Parties and would be mutually beneficial thereto.

LEASE OF WATER RIGHTS

THIS AGREEMENT is entered into this 13th day of August, 1974, by and between the City of El Segundo a general law city of the State of California, hereinafter referred to as "City" and MOBIL OIL CORPORATION, hereinafter referred to as "MOBIL".

For and in consideration of the mutual undertakings and obligations of the parties as hereinafter set out and for other valuable consideration, the parties hereto agree as follows:

1. City hereby leases to MOBIL and MOBIL takes from City the right to exercise City's appropriative, prescriptive and adjudicated right to extract water from the West Coast Basin (the ground water basin within the Central and West Basin Water Replenishment District in the State of California) to the extent of Three Hundred (300) acre feet.
2. The term of this lease shall be for the water year commencing October 1, 1973, and continuing to and including September 30, 1974.
3. MOBIL shall pay, before delinquency, all pumping assessments levied by the Central and West Basin Water Replenishment District on City's said Three Hundred (300) acre feet of water right.
4. City has been adjudicated to own at least Three Hundred (300) acre feet of water in the case entitled CALIFORNIA WATER SERVICE COMPANY, et al vs CITY OF COMPTON, et al, Los Angeles Superior Court Case No. 506,806. However, City expressly makes no warranty that it is the owner of or has the right to lease the water rights purported to be leased hereunder. In the event, however, that it is deemed at any time during the term hereof that City does not own the rights leased hereunder or any part thereof, City shall return to MOBIL any consideration paid to City, computed on the agreed price per acre foot for any water rights which MOBIL is unable to exercise because of City's lack of ownership in said water rights. City does not warrant that there is sufficient water in said West Basin so as to enable MOBIL to extract the rights leased to it hereunder, but in the event that MOBIL is prevented from exercising all or any portion of the rights leased hereunder due to exhaustion of said basin or intervention or prohibition by any legally constituted government authority, any consideration paid by MOBIL to City shall be returned to MOBIL upon the same basis as that stated above.

5. MOBIL shall exercise all of the rights leased hereunder and shall pump the same on behalf of City and shall put the same to beneficial use. MOBIL shall be relieved of its obligations under this paragraph to the extent that its failure to pump any of City's rights leased hereunder is caused by MOBIL'S inability to pump or use such water due to strikes, lockouts, algae growth in the water table, or any other reason which would make the water industrially unusable by MOBIL, acts of God, or other acts or occasions of which MOBIL has no control. MOBIL shall notify City within a reasonable time of the existence of any of the aforementioned conditions.
6. City shall not pump water from said West Basin during the term of this lease in a quantity which would include any portion of the Three Hundred (300) acre feet leased hereunder.
7. MOBIL shall report all of its extractions made pursuant to this lease to all agencies to whom such reports must be made, or in the alternative, shall provide such information regarding its pumping to City so that City may make such reports, if any are required. City shall not be liable for any

8. If either party to this lease shall desire to service a notice on the other, such notice shall be deemed to have been made if those sent to City are mailed to Mr. W. M. Glickman, Director of Public Works, City Hall, 330 Main Street, El Segundo, California 90245, and all notices sent to MOBIL are mailed to Mr. Arthur B. Hiser, Refinery Manager, Mobil Oil Corporation, 3700 West 190th Street, Torrance, California 90508. Delivery will be deemed to have been made when deposited in the United States mail, postage prepaid. Either party may, by notice in writing to the other, change such address for notices to it.

LEASE OF WATER RIGHTS

THIS AGREEMENT is entered into this 1st day of October, 1973 by and between STANDARD OIL COMPANY OF CALIFORNIA, WESTERN OPERATIONS, INC., (a division of Standard Oil Company of California, a Delaware Corporation), hereinafter referred to as "STANDARD" and MOBIL OIL CORPORATION, hereinafter referred to as "MOBIL".

For and in consideration of the mutual undertakings and obligations of the parties as hereinafter set out and for other valuable consideration, the parties hereto agree as follows:

1. STANDARD hereby leases to MOBIL and MOBIL takes from STANDARD the right to exercise STANDARD'S appropriative, prescriptive and adjudicated right to extract water from the West Coast Basin (the ground water basin within the Central and West Basin Water Replenishment District in the State of California) to the extent of One Thousand Five Hundred (1,500) acre feet.
2. The term of this lease shall be for the water year commencing October 1, 1973, and continuing to and including September 30, 1974.
3. MOBIL shall pay, before delinquency, all pumping assessments levied by the Central and West Basin Water Replenishment District on STANDARD'S said One Thousand Five Hundred (1,500) acre feet of water right.
4. STANDARD has been adjudicated to own at least One Thousand Five Hundred (1,500) acre feet of water in the case entitled CALIFORNIA WATER SERVICE COMPANY, et al vs CITY OF COMPTON, et al, Los Angeles Superior Court Case No. 506,806. However, STANDARD expressly makes no warranty that it is the owner of or has the right to lease the water rights purported to be leased hereunder. In the event, however, that it is deemed at any time during the term hereof that STANDARD does not own the rights leased hereunder or any part thereof, STANDARD shall return to MOBIL any

- [illegible]

This agreement is entered into this 16th day of August, 1974, by and between Southern California Edison Company, a California corporation, hereinafter referred to as LICENSOR, and Mitsubishi Motors, hereinafter referred to as LICENSEE.

For and in consideration of the mutual undertakings and obligations of the parties as hereinafter set forth and for other valuable consideration, the parties hereto agree as follows:

1. LICENSOR hereby gives to LICENSEE and LICENSEE takes from LICENSOR the right to exercise LICENSEE'S appropriate rights and to adjudicate right(s) to extract water from the West Coast City Municipal Replenishment District within the Central and West Basin Replenishment District in the State of California to the extent of thirty-one acre-feet of water per year.
2. The term of this license shall be for the water year commencing October 1, 1972, and continuing to and including October 1, 1973, provided, however, that this agreement shall terminate if, at any time, the application, cancellation or termination of the license previously granted to LICENSOR by the Board of Water Commissioners of the City of Los Angeles, bearing licensor's document number _____, is reversed.
3. LICENSEE shall pay, before delinquency, all pumping assessments levied by the Central and West Basin Water Replenishment District in accordance with the following schedule:
- _____ acre-feet of water per year
_____ acre-feet of water per year
4. LICENSEE SHALL comply promptly with all requirements of the Central and West Basin Replenishment District (including the filing of pumping applications and payment of exchange pool water if necessary) and those of any public agency or agency of the State of California.
5. LICENSOR has been adjudicated to own at least fifty-seven and one-half (57 1/2) acre-feet of water in the water entitled "California Water Service Company, et al., v. City of Los Angeles" (1968) 235 Cal. App. 2d 101, 29 Cal. R.S. 508,806. However, LICENSOR agrees Superior Court warranty that it is the owner of or has the right to give to LICENSEE the right to exercise the right to extract water NOT warrant that there is sufficient water in said water right to exercise as to enable LICENSEE to extract the water to the extent of the aforesaid conditions.
6. LICENSEE shall exercise all of the rights given hereunder and shall pump the same on behalf of LICENSOR and shall put the same to beneficial use. LICENSEE shall be relieved of any obligations under this license to the extent that its failure to pump any of LICENSOR'S shares of water hereunder is due to LICENSOR'S inability to pump or use such water due to strikes, lockouts, or inability to pump or the water table or any other reason which would make the water right of LICENSOR inoperative. LICENSOR'S shares of water of or under other acts or occasions of which LICENSEE shall not pump LICENSOR within a reasonable time of the exercise of any of the aforesaid conditions.

If either party to this lease shall desire to serve a notice on the other, such notice shall be deemed to have been made if that notice is STANDARD is mailed to Mr. Theron Ripps, General Manager, Attention: N. C. D. Barker, Standard Oil Company of California, Western Operations, Inc., 324 West El Segundo Boulevard, El Segundo, California 90745, and all notices sent to NDOI will be mailed to Mr. J. Hagg, Attention: Mr. P. R. Carl, Mobil Oil Corporation, 3000 West 104th Street, Torrance, California 90509. Delivery will be deemed to have been made when deposited in the United States mail, postage prepaid. Either party may, by notice in writing to the other, change such address for notices to it.

IN WITNESS WHEREOF THE parties hereto execute this agreement on the
date first above written.

LICENSE FOR WATER RIGHT: WEST COAST BASIN

This agreement is entered into this 16th day
of August, 1974, by and between SOUTHERN CALIFORNIA
Edison Company, a California corporation, hereinafter referred
to as LICENSOR, and City of Pico, hereinafter referred to as LICENSEE.

For and in consideration of the mutual undertakings and
obligations of the parties as hereinafter set forth and for
other valuable consideration, the parties hereto agree as follows:

1. LICENSOR hereby gives to LICENSEE and LICENSEE
takes from LICENSOR the right to exercise LICENSOR's approp-
riative, prescriptive and adjudicated right(s) to extract
water from the West Coast Basin (the ground water basin
within the Central and West Basin Water Replenishment District
in the State of California) to the extent of Twenty-five
(25) acre-foot per annum.

2. The term of this license shall be for the water
year commencing October 1, 1973, and continuing to and
including September 30, 1974. Provided, however, that this
agreement shall terminate immediately upon the expiration,
revocation or termination of the license previously granted to
Chicago Steel, bearing LICENSOR's
document number 227153.

3. LICENSOR shall pay, before delinquency, all
pumping assessments levied by the Central and West Basin
Water Replenishment District in LICENSOR's said Twenty-five
Five (25) acre-foot of water
right(s).

4. LICENSEE shall comply promptly with all requirements
of the Central and West Basin Water Replenishment District
(including the filing of pumpage reports) and the obtaining of
exchange pool water if necessary and those of any public
agency or authority.

5. LICENSOR has been adjudicated to own at least
fifty-seven and one tenth (57 1/10) acre-feet of water in the
case entitled "California Water Service Company, et al.,
vs. City of Compton, et al.", Los Angeles Superior Court
Case No. 506806. However, LICENSOR expressly makes no
warranty that it is the owner of or has the right to give
the water rights purported to be given hereunder. LICENSOR
does NOT warrant that there is sufficient water in said
West Coast Basin as to enable LICENSEE to extract the
rights given to it hereunder.

6. LICENSOR shall exercise all of the rights given
hereunder and shall pump the same on behalf of LICENSEE
and shall put the same to beneficial use. LICENSEE shall
be relieved of its obligations under this paragraph to the
extent that its failure to pump any of LICENSOR's rights
given hereunder is caused by LICENSOR's inability to pump or
use such water due to strikes, lockouts, algae growth in
the water table or any other reason which would make the
water agriculturally or industrially unusable by LICENSEE,
acts of God or other acts or occasions of which LICENSEE
shall notify LICENSOR within a reasonable time of the
occurrence of any of the aforementioned conditions.

DUPLICATE ORIGINAL

7. LICENSOR shall not pump water from said West
Coast Basin during the term of this license in a quantity
which would include any portion of the Twenty-five
(25) acre-feet given hereunder.

8. LICENSEE agrees to relinquish to LICENSOR the
right to pump any of the Twenty-five
(25) acre-feet herein if it is not pumped by the
LICENSEE during the term of this license.

9. If either party to this license shall desire to
serve a notice on the other, such notice shall be deemed
to have been made if those sent to LICENSOR are mailed to
Manager of Right of Way and Land Department, Southern
California Edison Company, 14444 Van Ness Avenue, 2344 Walnut
California 94040. Attention of Supervisor of Property
Management, and all notices sent to LICENSEE are mailed
to 18727 South Pacific Avenue, Torrance, CA 90504.

Notices will be deemed to have been
made when deposited in United States mail, postage prepaid.
Either party may, by notice in writing to the other, change
such address for notices to it.

IN WITNESS WHEREOF, the parties hereto execute this
agreement on the date first above written.

ASSIGNMENT, LEASE AND TRANSFER OF WATER RIGHTS

THIS AGREEMENT is made and entered into as of the date set
forth below by and between the CITY of ELIZABETH, a gen-
eral law city of the State of California, hereinafter referred
to as "City", and PICO COUNTY WATER DISTRICT, a county water
district organized under Division 12 of the Water Code of
California, hereinafter "Pico"

WITNESSETH

That the parties hereto do mutually agree as follows:
The City hereby leases and transfers to Pico during a
period commencing with the date hereof and continuing to and
including September 30, 1974, water rights consisting of the
right to pump 500 acre feet of water for and during said pe-
riod from the West Coast Basin, being the ground water basin
within the West Basin Water Replenishment District, in the
State of California.

Pico shall pay to City a rental of Twenty-nine and No/100ths
Dollars (\$29.00) per acre foot for the water rights leased
and transferred hereunder.

Subject to the limitation hereinafter imposed, the total
quantity of water which Pico shall be entitled to pump as a
result of this lease and transfer is five hundred (500) acre
feet and the total consideration therefor, computed on the basis
of said rental of Twenty-nine and No/100ths Dollars (\$29.00)
per acre foot, is Fourteen Thousand, Five Hundred Dollars
(\$14,500.00), which shall be paid to the City in two equal
installments, one the 15th day of October, 1974, and the other
the 15th day of November, 1974.

Notwithstanding the foregoing lease and transfer of City's water rights, it is mutually agreed between the parties that City may at any time without prior notification or approval of Pico pump any portion of said five hundred (500) acre feet of water at any time that City determines that an emergency requires the use of such water by the City of El Segundo. Immediately following any such pumping by the City, City shall notify Pico of the quantities pumped so that appropriate allocation may be made in reports required by law.

City represents and warrants that it owns said water rights leased and transferred hereunder, and that City has a right to pump said five hundred (500) acre feet of water for and during said period, and that City has the full right to lease and transfer to Pico said water rights and the right to pump said five hundred (500) acre feet of water during said period.

Dated this 6th day of August, 1974.

6. PICO shall exercise or cause to be exercised the right to pump said 350 acre feet of water leased hereunder and shall pump the same on behalf of UNITED STATES STEEL and shall put or cause to be put the same to beneficial use on or before September 30, 1974.

7. The last 350 acre feet of water extracted by PICO or others on its behalf from said West Coast Basin during the water year ending September 30, 1974, shall be deemed to be pursuant to and in exercise of the rights leased hereby; and if for any reason said last 350 acre feet of water cannot be considered or deemed to have been extracted pursuant to and in exercise of the rights leased hereby, then any 350 acre feet of water extracted by PICO or others on its behalf between the date hereof and September 30, 1974, shall be deemed to be pursuant to and in exercise of the rights leased hereby.

8. This lease shall not be construed in any way to be a transfer or to cause the transfer of any of Lessor's rights in said West Coast Basin except that PICO shall have the right to produce or cause to be produced by others 350 acre feet of water in and from the West Coast Basin during the water year ending September 30, 1974.

9. As further consideration for this lease, UNITED STATES STEEL shall have the right to demand from PICO 100 acre feet of water from the West Coast Basin during the water year October 1, 1974, to September 30, 1975, and PICO agrees to lease, or cause to be transferred to UNITED STATES STEEL the right to extract said 100 acre feet

2.

LEASE OF WATER RIGHTS

THIS LEASE is entered into the 22nd day of March 1974, by and between UNITED STATES STEEL CORPORATION, a Delaware corporation, hereinafter referred to as UNITED STATES STEEL, and PICO COUNTY WATER DISTRICT, a county water district organized under the Water Code of California, hereinafter referred to as PICO.

For and in consideration of the mutual undertakings and obligations of the parties as hereinafter set forth, and for other valuable consideration, the parties hereto agree as follows:

1. UNITED STATES STEEL has been adjudged to have a right to produce, extract and withdraw 1791 acre feet of water per annum from the West Coast Basin, which right is designated an Adjudicated Right, and is described in the Judgment in Los Angeles Superior Court Case No. 506806 entitled California Water Service Company, et al., v. City of Compton, et al.

2. UNITED STATES STEEL hereby leases to PICO and PICO hereby accepts from UNITED STATES STEEL a portion of said Adjudicated Right to the extent of 350 acre feet.

3. The term of this lease shall commence on the date of this lease and continue to and including September 30, 1974.

4. PICO shall pay to UNITED STATES STEEL the sum of \$10,500.00 on or before June 30, 1974.

5. PICO shall pay, before delinquency, all pumping assessments levied by the Central and West Basin Water Replenishment District on UNITED STATES STEEL's said 350 acre feet of water rights.

during said water year from said basin in the exercise of rights other than those presently owned by UNITED STATES STEEL. Said demand shall be made on or before June 1, 1975. Upon making the demand and receiving a lease of water rights in said quantity UNITED STATES STEEL shall pay to PICO the sum of \$3,000.00.

10. It is the intent of the parties that the lease of 350 acre feet of West Basin Water Rights of UNITED STATES STEEL shall not carry with it any rights to allowable overextraction or with respect to the computation of any carryover rights. It is the intent of both parties that UNITED STATES STEEL shall retain all of its rights with respect to allowable overextractions as though it had not leased any of its pumping allocation and that any computation of carryover rights shall be based on its allowed pumping allocation without reduction for the quantity leased hereby.

WATER USE LICENSE

The City of Inglewood, a municipal corporation, hereinafter referred to as "INGLEWOOD", hereby grants to ROLLING HILLS VISTA, a partnership, a licensee to extract 160 acre-feet of INGLEWOOD'S Restricted Pumping allocated to INGLEWOOD under the terms of the Decree in the action: California Water Service Company, et al., vs. Compton, No. 506806, during the period commencing October 1, 1973, and continuing to and including September 30, 1974.

(1) Licensee shall exercise said right and extract the same on behalf of INGLEWOOD during the period above specified and put the same to beneficial use and licensee shall not by the exercise hereunder of said right acquire any right to extract water independent of the rights of licensor.

(2) ROLLING HILLS VISTA will pay to the Central and West Basin Water Replenishment District any pumping assessments levied by the District during the 1974-75 water year on the quantity of water extracted by ROLLING HILLS VISTA from the West Basin under said license.

(3) ROLLING HILLS VISTA will keep and maintain records of agreed production under this agreement, and will report same to the Watermaster and to INGLEWOOD upon completion of ROLLING HILLS VISTA'S pumping.

INGLEWOOD warrants that it has 160 acre-feet of Restricted Pumping, and that it has not pumped and will not pump or permit or license any other person to pump any part of said 160 acre-feet during the period of October 1, 1973 through September 30, 1974.

AGREEMENT

THIS AGREEMENT made and entered into this 6th day of June, 1974, by and between the CITY OF INGLEWOOD, a municipal corporation, hereinafter referred to as "INGLEWOOD" and ROLLING HILLS VISTA, a partnership.

PICITALS

WHEREAS, both INGLEWOOD and ROLLING HILLS VISTA are producing from the West Basin, and

WHEREAS, both INGLEWOOD has an allowed pumping allocation of 4402.09 acre-feet of water per annum in said Basin; and WHEREAS ROLLING HILLS VISTA desires to make temporary use of a portion of INGLEWOOD'S allowed pumping allocation for one water year only;

NOW, THEREFORE, THE PARTIES HERETO AGREE AS FOLLOWS

1. INGLEWOOD has granted to ROLLING HILLS VISTA by a separate document a license to produce a portion of INGLEWOOD'S West Basin allowed pumping allocation in the quantity of 160 acre-feet for the water year which commences October 1, 1973, and which water year ends on September 30, 1974.

2. ROLLING HILLS VISTA agrees to pay INGLEWOOD the net sum of \$4640.00 in October, 1974.

IN WITNESS WHEREOF, the parties hereto have authorized the due execution hereof by their respective officers the day and year first above set forth.

EXCHANGE OF WATER RIGHTS

The parties hereto, STAUFFER CHEMICAL COMPANY, a corporation, hereinafter STAUFFER, and PICO COUNTY WATER DISTRICT, a county water district organized under Division 12 of the Water Code of California, hereinafter DISTRICT.

This agreement is based on the following facts:

1. STAUFFER has rights to produce water from the Central Basin of California adjudicated to it under Central and West Basin Water Replenishment District v. Charles E. Adams, et al., No. 786,856 Los Angeles Superior Court, and has the right to extract not less than 159.50 acre feet from said basin for the balance of the water year 1973-74.
2. DISTRICT has acquired by lease the right to extract in excess of 159.5 acre feet of water from the West Coast Basin for the balance of the water year 1973-74.
3. DISTRICT is presently obligated to provide 45 acre feet of West Basin Water Rights to STAUFFER pursuant to an agreement dated June 7, 1973.
4. The parties desire to exchange said rights on the terms and conditions set forth below.

The parties hereto agree as follows:

A. DISTRICT hereby gives and transfers to STAUFFER its rights to extract water from the West Coast

1.

Basin for the water year 1973-74 to the extent of 204.50 acre feet.

B. STAUFFER gives and transfers to DISTRICT its rights to extract water from the Central Basin for the water year 1973-74 to the extent of 159.5 acre feet.

C. Each party agrees to pay before delinquency all pumping assessments levied by the Central and West Basin Water Replenishment District on the water rights being transferred to each.

D. Each party agrees to pump and extract the full amount of water from the basin in which the transferred rights exist, to-wit, 159.5 acre feet by DISTRICT from Central Basin and 204.50 acre feet by STAUFFER from West Coast Basin and put said amount to beneficial use therein prior to the end of the 1973-74 water year.

E. STAUFFER agrees that the first 204.50 acre feet of water extracted by it from the West Coast Basin following the date of this agreement shall be deemed to be pursuant to and exercise of the rights transferred to it hereby and the DISTRICT agrees that 159.5 acre feet of the first 300 acre feet extracted by it following the date of this agreement from the Central Basin shall be deemed pursuant to and in exercise of the rights transferred to it hereby.

F. Each party agrees that the rights of each of them with respect to allowable overextractions or in the computation of carryover rights shall not be affected

2.

by the exchange of water rights provided herein. Their respective rights to allowable overextractions and carryover rights shall be determined and computed as though this exchange had not been made.
